JACQUELINE! JACQUELINE!

In Madison square, New York, is approached by an Eskimo dog. He follows the dog to a gambiling house and meets the animal's mistress coming out with a large amount of money. She is beautiful and in dis-tress and he follows her. After protecting her from two assaults takes her in charge.

CHAPTER 1-Continued.

When the taxicab deposited us in front of the house I glanced hastily up and down the road. There was another cab at the east end of the street, but I could not discern if it were approaching me or stationary. I opened the front door quickly and admitted my companion, then preceded her up the uncarpeted stairs to my little apartment on the top floor.

As I opened the door of my apartment the dog pushed past me. Again I had forgotten it; but it kad not forgotten its mistress.

"Till tomorrow, mademoiselle." said. "And won't you tel! me your, name?" "Jacqueline," she answered. "And

yours?

"Paul," I said. "Au revoir, Monsieur Paul, then, and take my gratitude with you for your goodness,'

Largest Earth Embankment. The Belle Fourche irrigation dam in South Dakota is the largest earth embankment in the world. Its construction was authorized by congress at a cost of \$5,000,000. From an engineering standpoint this project is one of the most interesting which the government has yet undertaken. Its principal structure is the earthen dam. This dike, which closes the lowest depression in the rim of a natural basin, is 6,200 feet long, 20 feet wide on top and 15 feet high in the highest place. The inside face of this structure, which has a slope of one to two, is protected from wind and wave action by two feet of screen gravel, on which are placed concrete blocks each 4 by 6 feet thick. The cubical contents of this dike are 42,000,000 feet, or about half of the famous pyramids of I had resumed my course when I was hands to my lips and caressed them. Cheops in Egypt. The reservoir created by this dam covers about 9,000 acres and will be the largest lake in

micro-organisms are not contagious

and do not spread by contact of dis-

ased with healthy animals.

(Prepared by the United States Depart- | age of the cultures. They deteriorate ment of Agriculture.) Among domestic animals employed o kill rats are the dog, the cat and the ferret.

Dogs,-The value of dogs as raters cannot be appreciated by persons who have had no experience with a trained animal. The ordinary cur and the larger breeds of dogs seldom develop the necessary qualities for ratters. Small Irish, Scotch and fox terriers, when properly trained, are superior to other breeds and under faverable circumstances may be relied upon to keep the farm premises reasonably free from rats.

Cats.-However valuable cats may be as mousers, few learn to catch rats. The ordinary house cat is too well fed and consequently too lazy to undertake the capture of an animal as formidable as the brown rat. Birds and mice are much more to its liking. Cats that are fearless of rats, and mice are the larger hawks and however, and have learned to hunt and lowls, skunks, foxes, covotes, weasels destroy them are often very useful minks, dogs, cats and ferrets. about stables and warehouses. speaking civilization. What do you say that we all try to ease up a bit? How about cutting lown our profanity output at the rate of one dama a day?-Stars and Stripes,

It is a wise man that does not repeat nis own wisdom,

Elevator Boy Rightly Felt That He ness of Life. "Poor laddie," said the woman to

the hotel elevator boy, "don't you find this work rather trying and monotonous?" "No fear, missus! I like it. It's

full of excitement. First of all, there's always the funniest people coming in and out. Then there's other things. "Only yesterday a man tried to get out before the car was down and cracked his skull. Then last week the machine broke, and the thing came November. And the chaplains who straight down from the sixth floor to the bottom, and everybody was hurt 'cept me. This ere rope, too, looks a bit weak, but 'it'll probably last till

we get up, though I don't know what

we'll do if it doesn't, 'cos the engine

man is away ill today, and I'm in

clarge of everything, and I don't know nothing about it. So it ain't really what you could call a dull life, is it?"

Man's Way. Never in the world would a man believe the things from an old friend that he will accept without question from a strange speculator,-Indianapolis News.

Shakespeare was evidently an admirer of the fair sex-his heroines are many and his heroes few.

# **Economy in Postum**

Boil Postum as long as you please, and you will extract only healthful goodness. You'll get no caffeinethe coffee-drug-for there's none in

# The Original POSTUM CEREAL

in fact, should be boiled fully 15 minutes, and if desired the pot can be kept going from meal to meal, adding more Postum and water for the new service.

Postum is the favorite of large numbers of former coffee-drinkers and can be secured from grocers everywhere.

Two Sizes, usually sold at 15c and 25c.

A Delicious, Invigorating and Healthful Drink

"There's a Reason"

away and find a hotel in which to steep. I fistened minute after minute. tree will emit a nauscating odor. The but I could not hear a sound, natives call it the "angry tree." "Yes, monsieur," At last I put my mouth to the key I raised her in my arms and laid tole and spoke to her. "Jacqueline," Strawberries for Fall. her on the bed, telling her to close Why Spinsters, called. There was no answer. Order a few autumn bearing straw-The reason that unmarried indies her eyes and sleep. She was asleep Then a little louder: "Jacqueline! almost immediately after her head are called spinsters is that formerly And then quite loudly: "Jacque women were prohibited from marrying I watched her for a while until I until they had spun a complete set of Then, out of the silence, hammering my eardrams, burst the loud tick-the little alarm clock that I This recalled me to the dangers of today what a falling off there would If the same rule prevailed made a constant source of revent. under favorable seasonal conditions,
